

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE: 8 OCT 1982

SUBJECT: Region 9 Recommendation on California's  
UIC Class II Application

FROM: William M. Thurston, Chief   
Water Supply Section, Region 9

TO: Phil Tate  
UIC Review Coordinator  
State Program Division (WH-550)

Attached are two sets of the material sent to the Administrator recommending that the 1425 UIC application submitted by the California Division of Oil and Gas be approved and the Division granted primacy.

I have not included among the attachments the original 1425 application submitted in April, 1981. Reviewers should already have copies.

If the original material sent to the Administrator is not received by you within a reasonable time, please call either Nathan Lau or me. The region can send another typesetting request.
